HEMCORE HORSE BEDDING

- Highly Absorbent
- Low Odour
- Dust Extracted
- Labour Saving
- Ease Of Disposal
- Convenient To Use
- Economical In Use

British produced Horse Bedding

Hemcore has a very high absorbency, being considerably more absorbent and therefore more economical than straw and shavings.

Hemcore is dust extracted and is healthy, warm and comfortable for all horses.

Hemcore is labour saving and economical in use. It creates a smaller muck heap which quickly produces excellent garden or agricultural compost.

Hemcore is grown and produced in Britain.
